The Roscongress Foundation is launching a special section of its information and analytical system about the measures against the coronavirus epidemic. COVID-19 is an infectious disease which started in late 2019 and has grown into a pandemic by early 2020. Federal and local authorities globally are taking active steps to combat the spread of the infection. The new section is designed to help healthcare specialists, public officials, and businessmen work out effective solutions, while members of the public can benefit from practical advice on how to protect their loved ones and themselves from the infection.

The section is created with support from the Higher School of Healthcare Organization and Management.
